A results-driven Source to Pay Manager with extensive experience in managing end-to-end procurement and supply chain processes. Proficient in SAP S/4HANA, SAP Ariba and Coupa, with a proven track record of optimizing procurement operations, enhancing supplier collaboration, and driving cost efficiencies. Adept at implementing Source-to-Pay (S2P) solutions, aligning business objectives with technology, and leading cross-functional teams through successful ERP transformations. Anything and everything to do integration for Procurement, Supply chain solutions with SAP S/4 HANA, SAP S/4HANA Cloud, BTP, SAP & Non-SAP Cloud Applications and ERPs.

Summary

- **14 years of hands-on experience** in **Solution Architecture and Project Management**, with a strong track record of delivering complex solutions aligned with business goals.
- **10 years of proficiency** in **SAP S/4HANA and SAP MM/SD/FI**, ensuring seamless business operations and process optimization in core ERP modules.
- **10 years of expertise** in **SAP Ariba, Fieldglass, Concur, Cloud Integration Gateway (CIG), and ITK**, enabling seamless procurement and cloud integration solutions.
- **10 years of experience** with **SAP PI/PO/CPI/BTP integrations**, specializing in end-to-end integration processes across diverse platforms.
- **4 years of experience** in **SAP BASIS and Security**, ensuring robust system architecture, user management, and platform security.
- **4 years of expertise** in **Infrastructure, Cloud Migrations**, and managing **Hyperscalers** (AWS, GCP, Azure), focusing on scalable, secure cloud solutions.
- **6+ years with Accenture (Dec 2010 - Jan 2017)**, **1.7 years with TCS (Feb 2017 - Oct 2018)**, **3.5 years with SAP**, and **2.5 years with Kimberly Clark**, leading global projects in various capacities.

PROFESSIONAL HIGHLIGHTS
14 years' experience with S2P/ARIBA/Coupa/MM/Integration Manager
Job Profile:
- Have experience in **3 implementations**, **3 Support**, **2 rollout** experience in SAP MM/ /S4Hana/ARIBA/Coupa/PI/PO/CPI
- Good understanding of the project lifecycle and all phases. The ability to review and contribute to project plans in terms of understanding dependencies and effort estimations.
- Ability to Manage, track and report project progress, risks and issues.
- Involved in the preparation, conception, realization, and Go Live of customer implementation projects.
- Requirements Gathering, Conducting Business Process Workshops & Blueprint Preparation.
- Translated business requirements into SAP functional and configuration requirements.
- Worked on **1809/1909/2020** S4HANA **On Premise and On Cloud**
- Architecting solutions and landscapes for SAP/non-SAP ERPs
- Driven **RFI/RFQ/RFP** responses ensuring alignment with Organizational Senior Management and Customer/Partner/C level
- Experience in presales for technical presentation for new Clients
- End to End implementation of Ariba with Cloud Integration Gateway
- Extensive experience in **SAP Ariba Buyer, Ariba Sourcing, Ariba Contract Management, Ariba Supplier Information Management, Ariba Supplier Performance Management**, Ariba procurement content, Upgrade, Roll Out, Enhancement & Support.
- Extensive knowledge on Ariba & S/4/ECC integration, AWS Admin activities for hosting SAP solutions
- Cloud Connector and extensive cloud to cloud or cloud to on prem integrations
- SAP Fieldglass and SAP Concur Integrations
- Supply chain scenarios including IBP/AN/S/4 Integrations

✳ Kimberly-Clark

1. Coupa Implementation Project (Jun 2022 - Till date)

Role: Technology Manager Working on end-to-end implementations for Coupa to SAP ECC and SAP S/4Hana.

- Architecting the landscapes for different scenarios for SAP/non-SAP
- Implementing the Sourcing & Contracts, Supplier Lifecycle, Enablement modules
- Managing the project and sprint planning
- Leading the support for existing procurement processes for Ariba/Coupa/MDG
- Catalog Management (Hosted/PunchOuts), Cxml setups and supplier integrations.
- Source to Pay roll outs for NA/EMEA/LAO/APAC regions.
- SAP ECC upgrades to S/4 Hana systems
- MDG-S for governance related to Supplier Master
- Functional Specifications/Unit Tests review
- Leading the SIT/UAT and Cut Over processes.
- Change Management and CI/CD processes support.
- ETL processes for data loads in MDG/Coupa for suppliers
- **Coupa certified** Supplier Management Professional
- Managing E2E Risk Assess methodologies for cybersecurity, social compliance, Anti-Corruption, Financial and Legal etc domains.
- Won Q1 **Global Distinguished Performance Award** from S2P team at KC.

2. Source to Pay Implementation Project (Oct 2018 – Jun 2022)

Role: Solution Architect Configurations and adoptions of Ariba solutions, Innovations for Private Demo realms of partners. End to End Implementations of P2P,RFXs,RFIs,S2O,MDGS,Supply Chain Collaborations and other Ariba solutions integrated with SAP S4 Hana and APIs.

- Understand the business process of 100 plus partners and design scenarios
- Architecting the landscapes for SAP S/4Hana OP/Cloud and non SAP ERPs
- Integration of Ariba suite of applications with SAP and 3rd party systems
- Master data Integrations with MDGS
- Create and maintain template of ARIBA SLP, Sourcing, and contract
- Perform end to end development activities for ERP to ARIBA scenarios
- Worked on Guided buying, Spend Analytics, Central Procurement/Sourcing,SLP,P2P
- Perform Ariba cutover activity with various module
- Worked on ODATA APIs and Oauth scenarios
- Developed complex integration scenarios with SAP<>BTP<>Concur for GTM
- Worked on ARIBA P2O and Sourcing and Contract, CIG, Cloud Connector, MM/SD/FI
- Represented **GTM for Intelligent Spend Management Solutions** covering SAP Ariba, Concur and S/4 Hana integrations.
- Presented Multiple Ariba suite POC scenarios to various participants during **SAP TechED** at our Source to Pay Pod.
- Conducted **Partner Success Days** and multiple other events at SAP for partners and external members.

3. S/4Hana/ERP Implementations Project (Feb 2017 – Oct 2018)

Role: Integration Architect Integration Lead for SAP Ariba solutions and various A2A/B2B configurations for SAP CPI/PI/PO via SOAP/OData/REST/Java Solution Architecture for complex landscapes including SAP/NonSAP ERPs other Middlewares

- Responsible for leading the team of 6 developers.
- Acting as Solution Advisor for new implementations
- Understand the business process of Thomson Reuters given our solution to improve the current business process.
- Experience of working on projects across all stages viz. Blueprint, Realization, Integration Testing, Implementation.
- Involved in end to end configurations of interfaces in SAP/PI/PO/CPI systems
- Hands on exposure on Admin/monitoring and transport management activities.
- Involved in preparation of 'AS-IS' process.
- Involved in Configuration & Unit Testing
- Worked on iflows/NWDS
- Performed Integration Testing.
- Configure Output Message.
- Worked on IDOC with various interface.
- Output message determination in SAP MM
- Maintain User Attribute, Vendor replication, Purch Org Creation, Purch Group Creation etc.

4. Multiple Implementations/Support Projects (Dec 2010 – Jan 2017)

Role: Sr Consultant SAP-CPI Development Consultant (PI/PO/CPI) having Exposure of Full Cycle Implementation (Design, Development, Integration Testing, Hyper care Support and Support) in both B2B and A2A Applications

- Worked as Integration consultant for diamond clients Novartis/Microsoft/Uniliver etc
- Hands on experience in Proxy/RFC and IDOCs
- Partner profile creations and SAP Functional configurations
- Worked on RFC destinations/SOAManager/QueueManagement
- Worked on Transports including SAP S/4Hana and SAP PI/PO
- SLD Admin activities exposure and keystore management
- Worked on complex mapping logics to transform business requirements using Java
- Exposure to all standard/custom adapters like SOAP/HTTP/REST/SFTP
- Worked on EDI Integrations with Seeburger/B2B Adapter for 850/810 scenarios
- Good knowledge on SQL/Oracle databases and JDBC adapters
- Resolve 100% incident within SLA.
- Work on ARIBA up-gradation activity.
- Requirement gathering from Business for new development.
- Resolve issues of ECC -ARIBA integration
- Ariba SAP, Ariba S/4 Hana Integration, SAP MM – SRM Integration, SAP ECC – Ariba Network Integration.
- Configuration of IDOC with various segment and Batch Job configuration
- Configuration of enterprise structure and all master data.

SAP COMPETENCIES
Functional - SAP Material management:
- Enterprise structure configuration
- S/4 OnPrem, S/4 Hana Cloud, Hybris, Migrations
- Master Data
- Purchasing
- Process in procurement
- Release procedure configuration
- Material movement and Stock transfers
- Physical Inventory
- Split Valuation
- STO set up
- Material Group Creation, Purchasing Group creation , Material type
- IDOC

Functional SAP BTP/CPI/PI/PO
- BTP Admin configurations
- Cockpit and subaccount configurations
- Tenant creation and configurations
- Webservice configurations and setups
- Transport and change list management
- Hypercare exposure
- BTP extension suite and Integration suite
- Cloud connector

Functional SAP ARIBA
- ECC/Hana- ARIBA integration
- ARIBA SLP
- Ariba Sourcing
- Ariba Commerce Automation
- ARIBA P2P
- Ariba Contract Management
- ARIBA Catalog Management
- ARIBA Supply Chain Collaboration

Functional Coupa
- Coupa P2O and ECC/S4 Integrations
- Coupa SIM Forms, Process Automator, Custom Fields
- Coupa Risk Asses, IRQ and DDQ Processes
- Coupa SIM and Core Integrations with MDG/ECC/S4
- Coupa Catalogs
- Coupa Admin for Tenant management

Functional Project Management
- Cross Functional Project Management
- Change Management
- Analytics and Reporting
- Stakeholder Management
